

SCIENTIFIC WRITING COURSE

2019/2020/II.

Instructor: Roman Andreev Dr.

Neptun code: **sciwritu0sm20gm** for MSc students, and **MAT/420** for PhD students

Date: to be determined

Description: If you care about the impact of your work at all, writing in English effectively is a prerequisite skill. Alas, generic advice is cheap when it comes to developing your written expression, whilst practice and constructive feedback are essential. Therefore, this course is primarily intended as a personalized open-end workshop where we will identify and push your own writing goals, whether homework, thesis, papers, figures, slides, code or just making the most of your reader's precious attention. The evaluation will be based on short written exercises (~80%) and participation (~20%).
